Redbooth Introduces Support for Google's New Android for Work Program, Making Mobile Work More Convenient Than Ever

On The Heels of Launching The First Enterprise App For Apple TV, Redbooth Continues To Expand Options For Mobile Work, Liberating Knowledge Workers From the Tyranny of Their Desks

REDWOOD CITY, Calif. (November 1, 2016) — Redbooth, the intuitive task and project management platform for teams, today announced that its Android app now supports Google's [Android for Work](#) program. Security-conscious companies with employees using their own mobile devices can now choose a platform that their employees enjoy using — and that their IT departments can successfully administer. Redbooth's app for Android for Work is paving the way for increased adoption and more secure management of company information accessed via mobile devices.

"We see great potential in the Android for Work platform, along with a true opportunity to make the lives of our customers easier," said Ben Falk, Redbooth's Director of Mobile. "We've taken the first big step in enhancing our app so it can be part of this exciting program. We look forward to continuing to partner with Google as this program enhances the mobile experience for our Android customers."

The Redbooth app for Android for Work is a friendly, streamlined experience that includes kanban view for to-do lists as well as the ability to easily assign tasks and deadlines, leave comments, and resolve tasks on the go. The app taps in directly to Redbooth's cloud-based task and project management platform, which can be used by a team or an entire company.

"Redbooth's Android for Work app is a simple yet powerful productivity application that capitalizes on the best principles of material design," Falk said. "It's a fun, best-in-class productivity tool for any Android user — and at the same time it's incredibly straightforward for long-time Redbooth customers. The whole experience is super-clean."

Redbooth's placement in the Google Play Store's Android for Work area follows on the heels of its launch of the first ever enterprise collaboration app for Apple TV, which brings a streamlined, responsive version of shared virtual team workspaces and planning templates into the boardroom and the living room. Redbooth is committed to providing teams with the optimal methods to access their work and collaborate with their colleagues, regardless of where they are located or the devices they're using.

Redbooth's free [Android for Work app](#) is available now on the Google Play store. Users who sign up through the app also receive a free trial of Redbooth's web app, where they can explore

the full suite of Redbooth's productivity tools with even more powerful features. For more information, visit <https://redbooth.com>
